

# ISLAMIC GARDEN

Islamic Garden Before (2011) - Aerial view

Bare landscaping of the old Islamic Garden

View of the Old High Court Building and Masjid Jamek Building, from the South

Islamic Garden After - Aerial view

The new pedestrian bridge improves connectivity by cutting walking distance from Dataran Merdeka to Masjid Jamek by **50%**

The design concept of the Islamic Garden is to expose the beauty of the architecture of the Mosque and create a tranquil place for rest and reflection

The original coconut trees were retained to safeguard the existence and appearance of the historical elements of the mosque

Water and shade guided the creation of a calm and peaceful inner courtyard garden with pools and water channels
